

Reducing waste via crop valorisation

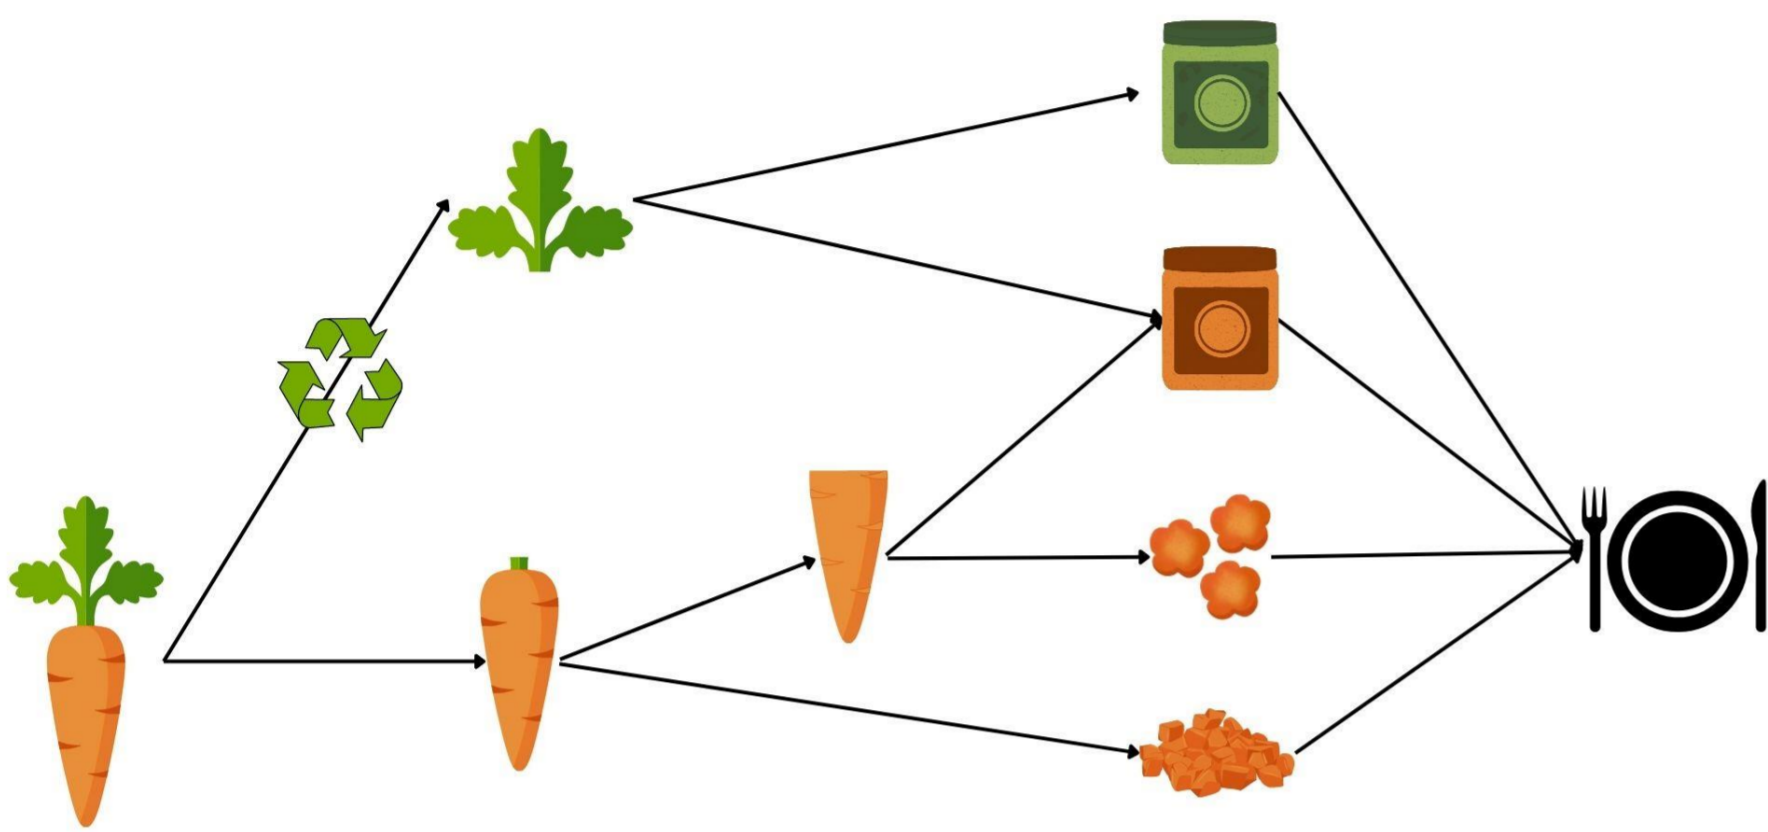

An optimisation approach to redesign agri-food supply chains

Name: Marloes Remijnse, Supervisor(s): Ahmadreza Marandi, Sonja Rohmer, Tom Van Woensel

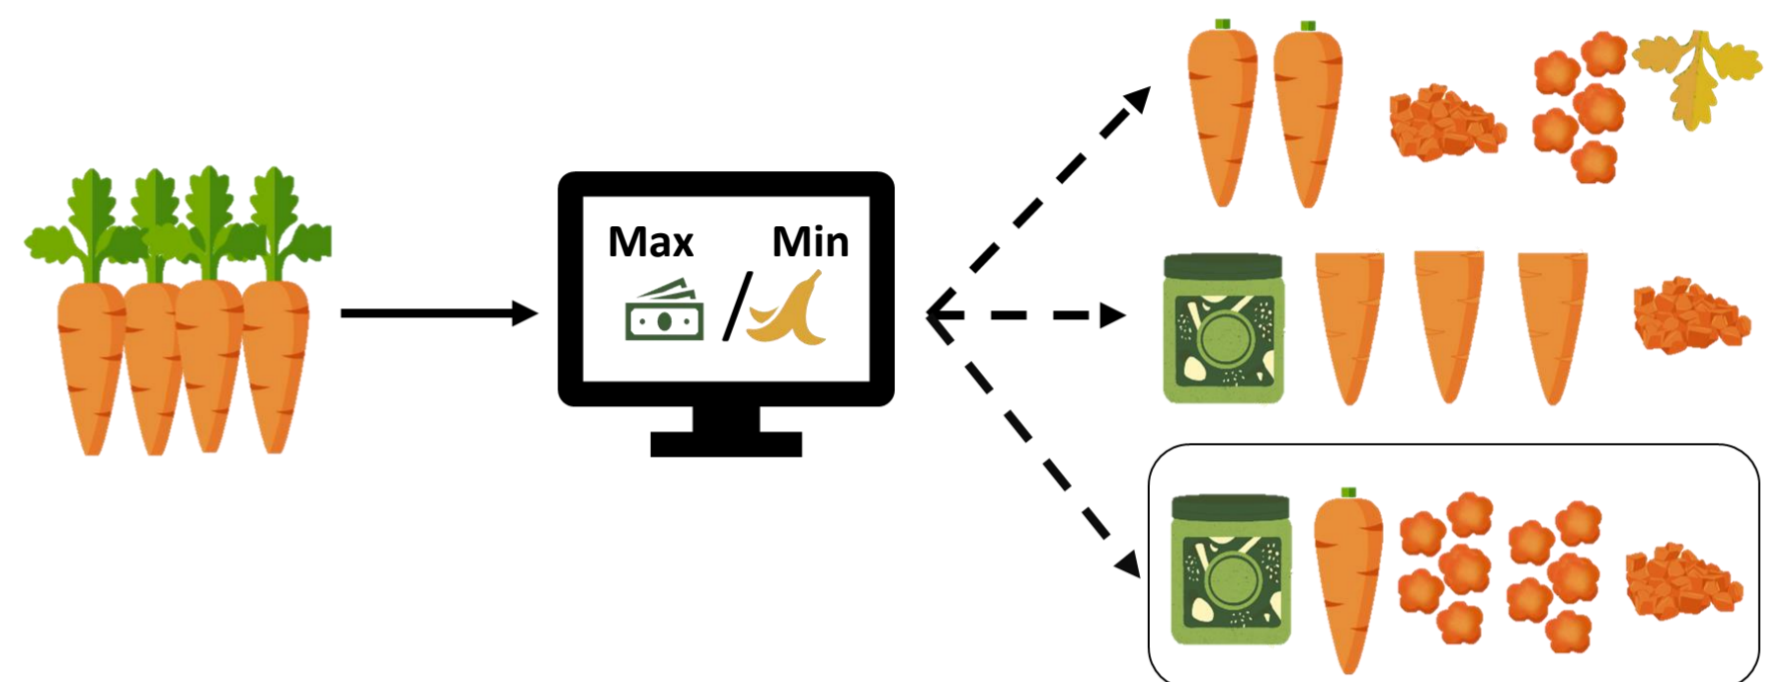

Contact details

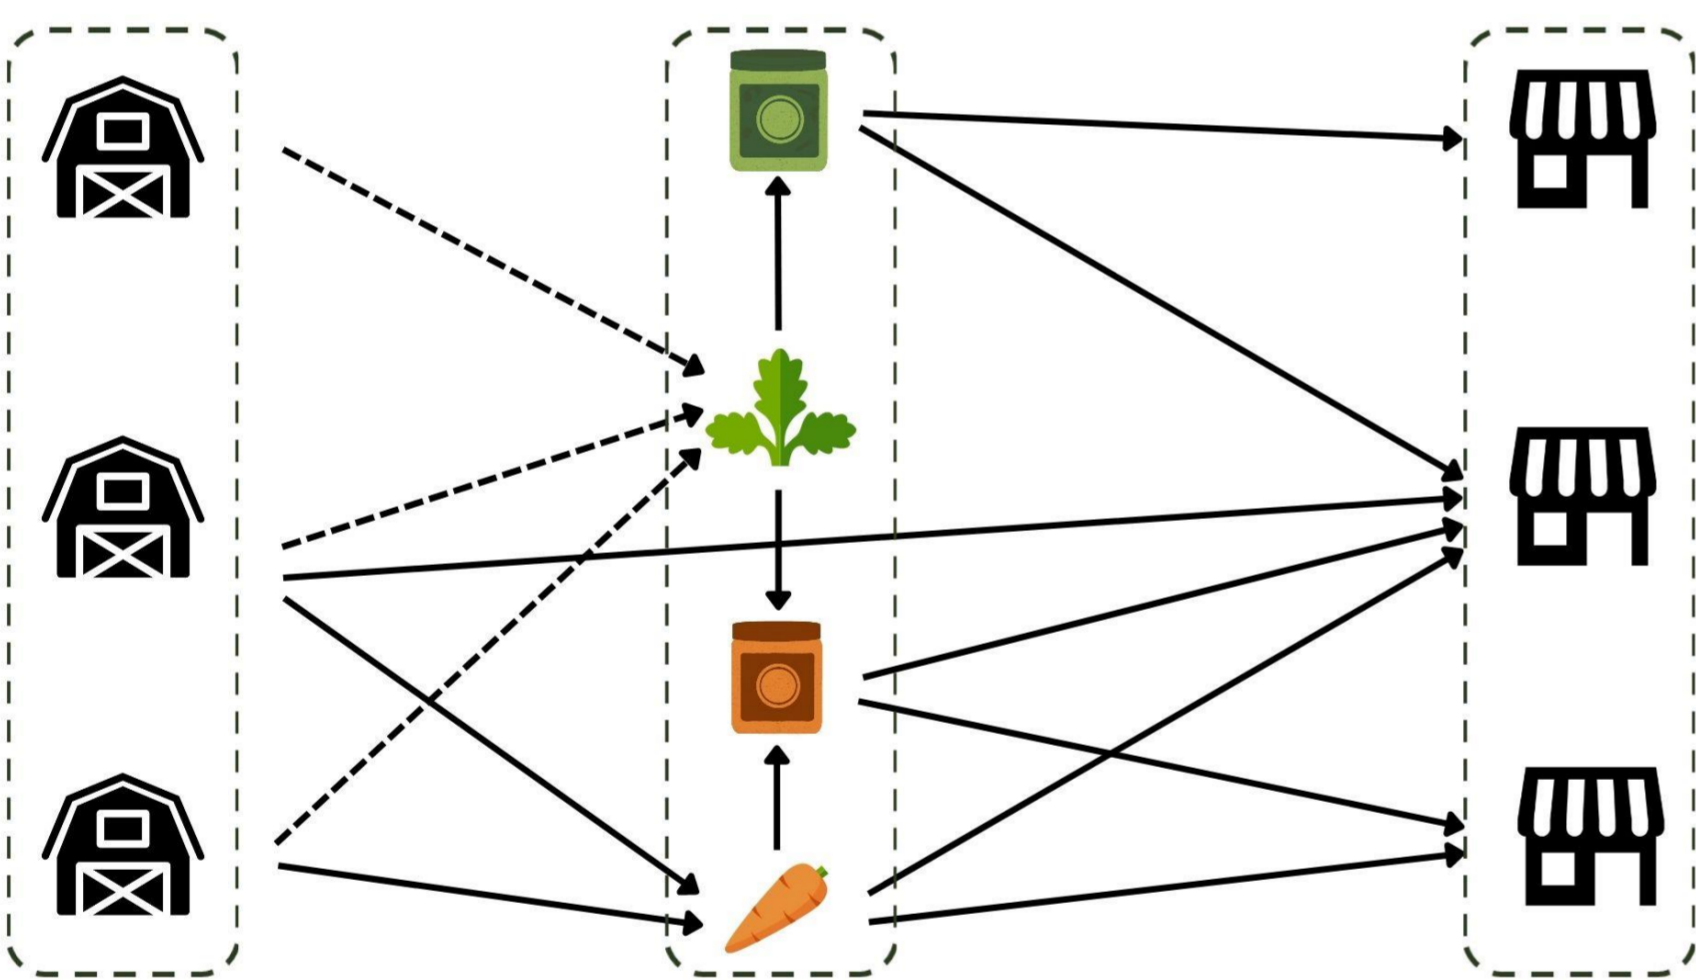

Crops and side streams can yield multiple products

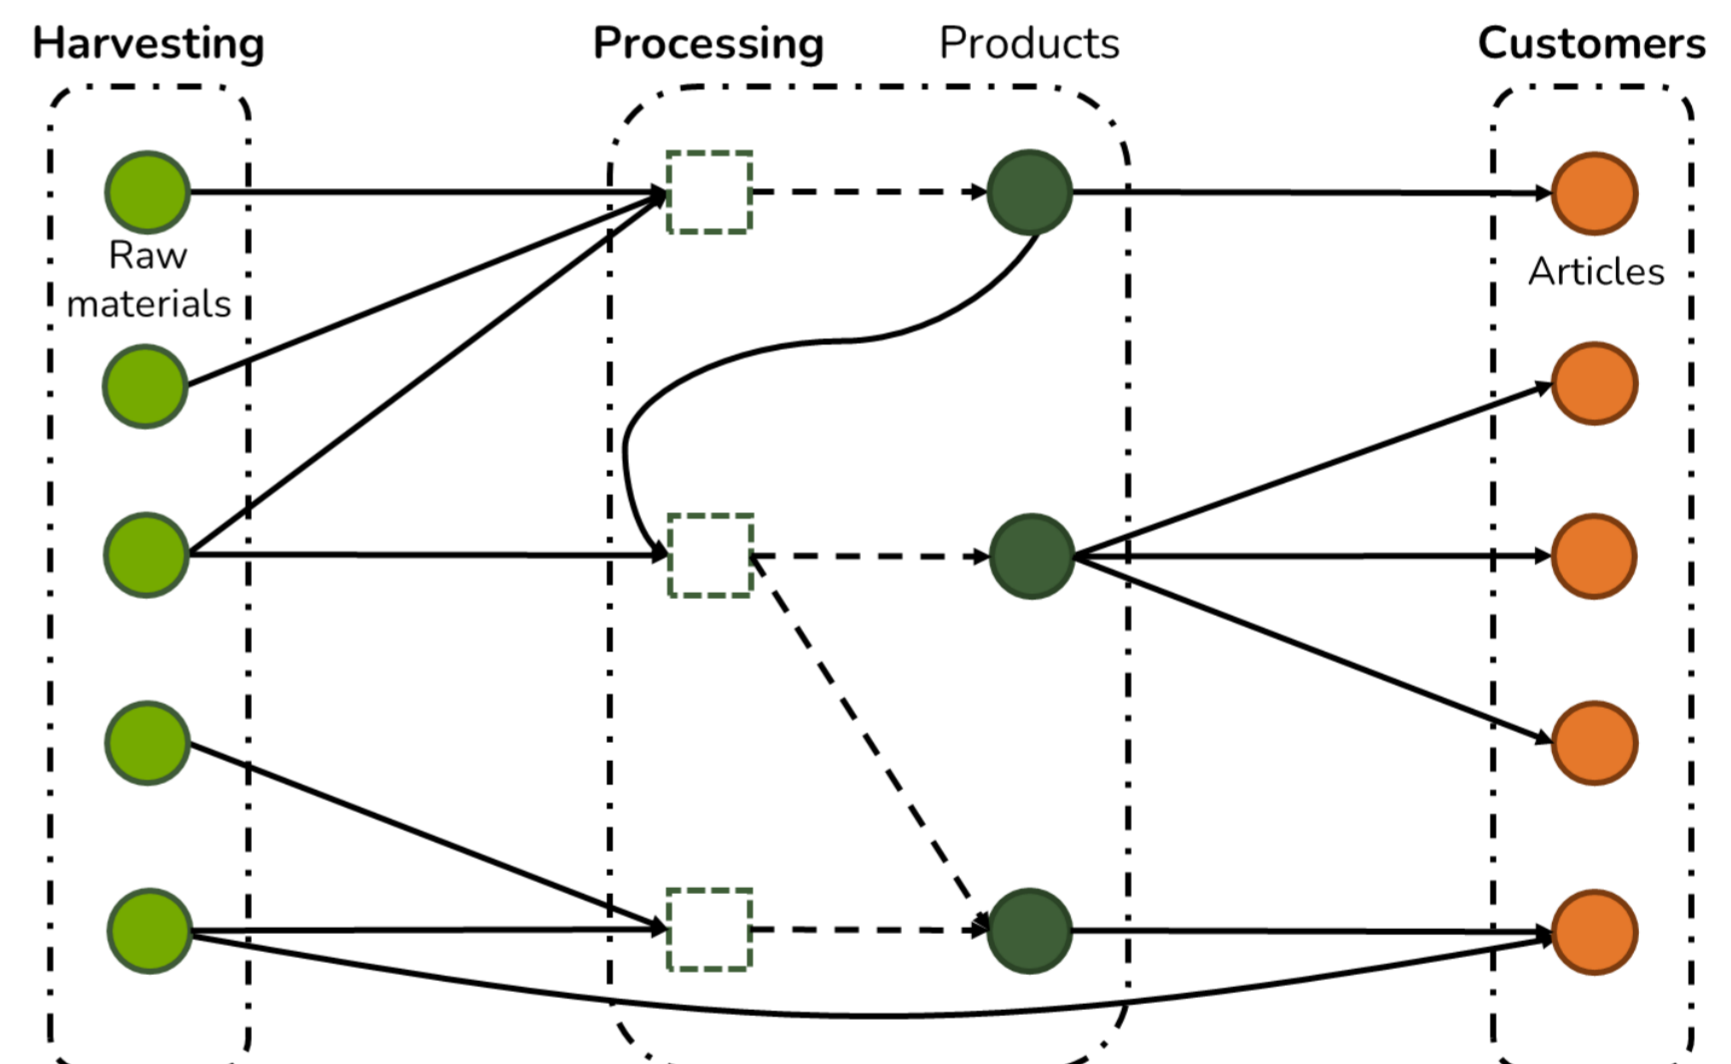

Our model determines the optimal product portfolio

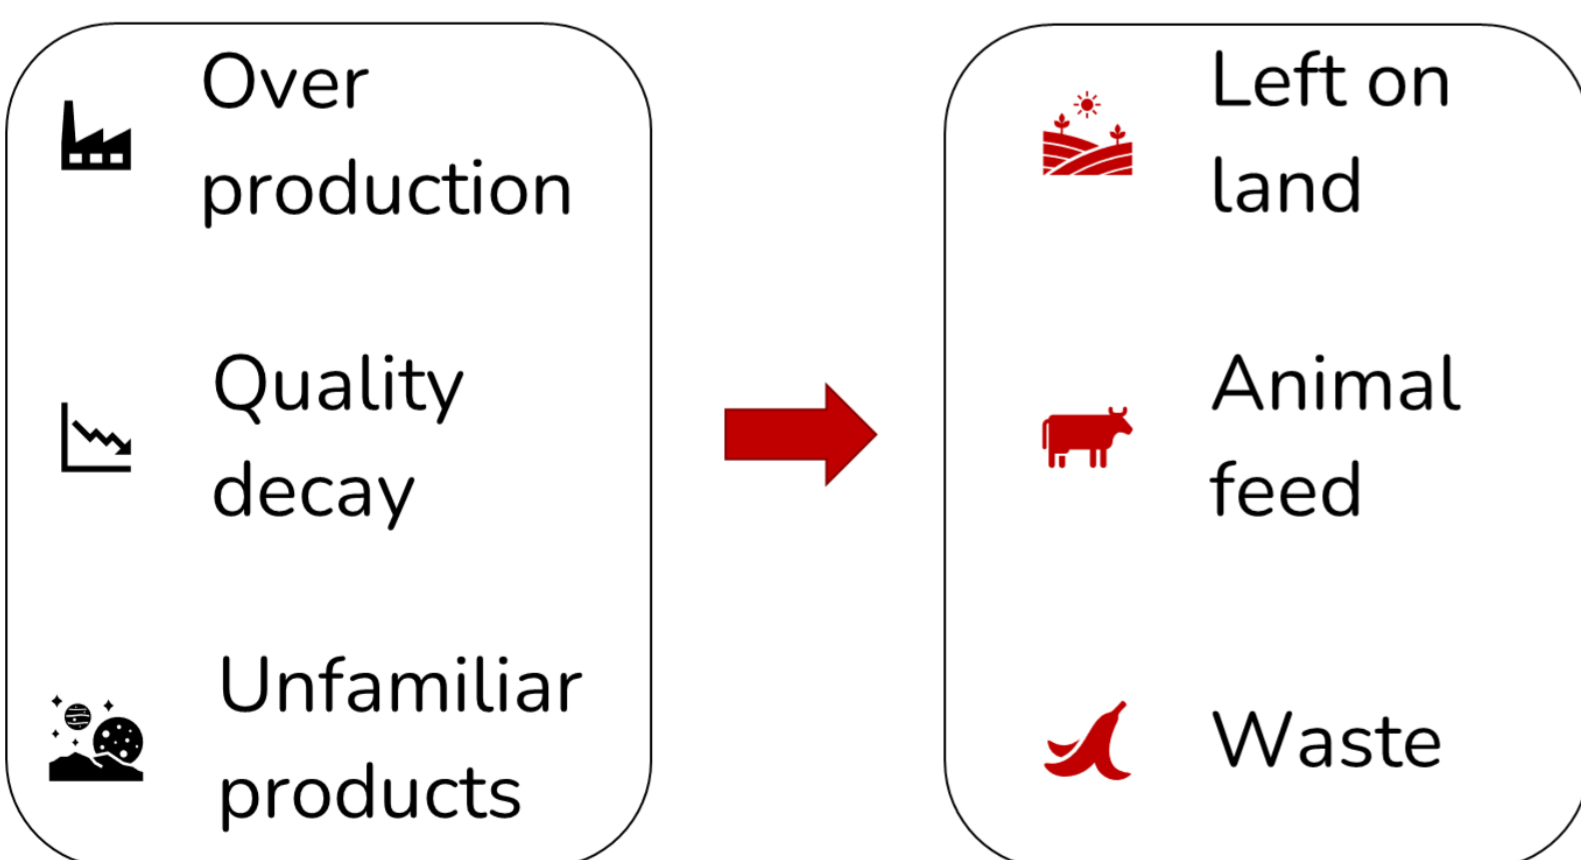

Product portfolio decisions impact the supply chain

The model solves a network design problem

Currently, crops are not valorised to their full potential

Our model combines multiple aspects, contributing to literature
