What strategy did you follow at the end of the game?

How much points did you receive?

Results from Experiments

Performance

- Especially, inexperienced players benefit from AI

| Score in treatments | Game 1 | Game 2 | Game 3 |
|---------------------|----------|--------|--------|
| No AI availables | 22.59*** | 24.76 | 25.50 |
| AI available | 25.33 | 25.33 | 25.50 |

Adherence

- Only 13 out of 116 participants (11%) always followed the AI plan as-is
- Participants often follow the AI advise, but also very frequently modify it

| Used AI plan As-Is | Deviated from AI plan |
|--------------------|-----------------------|
| 49,7% | 50,3% |

- Participants score higher, if they rely more on the AI.

What elements (do you think) would have increased your use of the AI advice?

38 responses

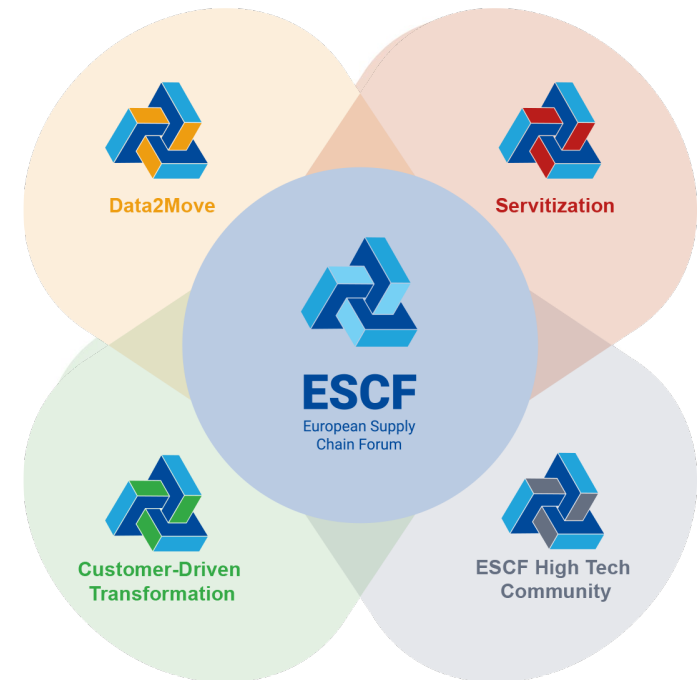

Now, take the perspective of the CEO:

- What is needed to make the AI integration successful in the short and long term?
- How do you envision the future AI integration to look like?

Thank you!
